

### IN THE SPECIFICATION

Please delete the paragraph starting at page 2, line 5:

~~Furthermore, these approaches~~

Please amend the paragraph starting at page 9, line 22 as follows:

A *failover attribute* is a string that affects the allocation of a resource group in a cluster. The administrator must ~~spec-~~ specify system attributes (such as Auto\_Failback or Controlled\_Failback)[[.]] and can optionally supply site-specific attributes.
